The PSI Perinatal Psychopharmacology Advanced Training, provided by perinatal psychiatric experts, is an evidence-based training on psychiatric prescribing during pregnancy and lactation. It is designed for psychiatric prescribers who have previously completed at least fourteen hours of perinatal mental health training. This advanced training combines expert presentation with case studies, group discussion, and practical examples. It is an interactive, case-based advanced seminar, covering differential diagnosis, medication challenges, and your questions. This course is an approved prerequisite for the perinatal mental health certification in the psychopharmacology specialty.

Learning Objectives:

1. Describe approaches to common challenges of psychiatric prescribing for perinatal mental illness.
2. Describe decisions related to appropriate dosage during pregnancy and lactation.
3. Describe expert recommendations related to specific case examples.
4. Identify resources for evidence-based data about medication during pregnancy and lactation.
